### RP 320 SUMMER

- Better grip and improved handling on dry roads due to the asymmetrically arranged profile blocks
- Increased resistance to aquaplaning and improved grip in the wet thanks to the broad middle grooves and a narrow groove next to the outer shoulder
- Optimal braking performance and improved handling through the use of sipes with multiple angles in the profile shoulders

### RP 420 SUMMER

- High reserves of safety in the wet thanks to the circumferential drainage grooves and hydrodynamically-shaped transverse grooves in the shoulder area
- Superlative braking and better performance on wet roads through curved sipes in the inner and outer shoulders
- Reduced rolling resistance and better braking behaviour in the wet with a high proportion of silica and new polymers

### RP 520 VAN SUMMER

- Good dry and wet performance
- Balanced driving efficiency
- High driving comfort due to low noise level
- Optimized contact area between the tyre tread and the road results in good braking performance on dry roads
- High driving stability and longer tyre life
- Latest tyre technology for maximum security
